KOZLODUY NPP EAD

Kozloduy, Bulgaria

OFFER

Kharkiv branch «Engineering and Technical Center «KORO» of Company with limited liability Conformity Assessment Body «CERTATOM» (ETC «KORO»), Ukraine Kharkiv, informs on the interest and the possibility of providing services on: «Re-qualification of safety related valves for Units 5 and 6 of Kozloduy NPP EAD for severe environmental conditions (LOCA, HERB) during the extended period of operation».

ETC «KORO» has experience in performing equipment qualification for harsh environmental conditions and seismic resistance and extending the service life of equipment for Ukrainian NPP power units. Also ETC «KORO» carried out work on qualification and extension of the service life of cables for power units 5 and 6 of Kozloduy NPP.

ETC «KORO» has qualified personnel, the necessary equipment, experience in the implementation of at least 17 contracts for qualifying equipment for harsh environmental conditions and extending the service life of equipment for nuclear power plants.

According to our calculations, the total cost of Re-qualification of safety related valves for Units 5 and 6 of Kozloduy NPP EAD for severe environmental conditions (LOCA, HERB) during the extended period of operation is about **€ 290000**.

The term of the service is 16 months from the date of signing the contract.

The scope of work will include the preparation and analysis of baseline data, grouping, selection of type representatives, assessment of the current status, development of qualification methods, qualification according to selected methods, assessment of equipment renewal periods (qualifications), issuance of reporting documents, development of proposals for the preservation of qualifications or replacement of equipment.

Our addresses and details in the Appendix to this offer.

Please consider this offer.

With respect,

Director
