

TO: Chief Executive Officer

Kozloduy NPP EAD

3321, Kozloduy, Bulgaria

Dear Sir,

We have received information about your tender regarding single-phase autotransformer 267 MVA, $\frac{400}{\sqrt{3}} / \frac{231}{\sqrt{3}} / 31,5kV$, as well as a shunt reactor 52 MVA, 31.5 kV, according to tender documentation No. 51479.

According to above we are pleased to inform you that our company is the official partner in Europe of Transformers and Rectifiers (India) Limited, a leading manufacturer of transformer equipment.

Their address is Survey No. 427 P/3-4, & 431 P/1-2, Sarkhej-Bavla Highway, Village: Moraiya, Taluka: Sanand, Dist. Ahmedabad-382213 Gujarat, Indiana.

PRODUCT RANGE

Transformer range includes products ranging from 315 KVA to 500 MVA up to 765 kV. The product line consists of various types of transformers, including distribution transformers, power transformers, dry-type transformers, and specialty transformers. All products are manufactured to meet or exceed international standards, and our transformers are designed and tested to the highest industry standards.

CUSTOMIZATION

In addition, we offer customized transformer solutions tailored to your specific requirements. Experienced engineering team all time work closely cooperate with customer to develop a custom transformer that precisely matches customer specifications.

STANDARDS

Producer of transformers posses certified by Bureau Veritas for ISO 9001: 2015, ISO 14001: 2015, and ISO 45001: 2018 for quality systems, which demonstrates commitment to providing high-quality products and services.

EXPERIENCE

Producer of transformers supply transformers to many countries, including the United States of America, Australia, Canada, United Kingdom, Belgium, Latin America, Nigeria, Ghana, Kenya, Tanzania, Zimbabwe, South Africa, Philippines, Sri Lanka, UAE, Bangladesh, and many others.

As I mentioned above, the company T&R India has extensive experience in manufacturing such equipment and is ready to fulfill your order in collaboration with our company. I would like to mention that the production capabilities of our partners, T&R India, allow for the comprehensive execution of this order, including the necessary factory testing and visting your engineers at the production facility in India during of production process or on end on moment of final testing beafore shipment.

We want inform that due to circumstances beyond our control, the technical specification reached us in Bulgarian and with a delay. This requires some time for the translation of the entire technical documentation into English to enable us to accurately estimate the price in accordance with the technical requirements specified in the technical documentation.

On this moment we estimated cost of the transformer should range from 14,262 USD/MV to 18,216 USD/MV based on FOB terms. Precise and complete commercial offer we will send within 7 business days.

The expected delivery time for the order is approximately 120 calendar days.

With respect and hope for fruitful cooperation,
