# Conventional Horizontal Lathes Sinus 330/2000 D

## SKU: 300011

Sinus D is the largest series in the universal lathes segment. The construction follows a classic design but is based on a heavy, one-piece cast machine bed. As with heavy-duty lathes, the frictional connection between the motor and the spindle takes place via a manual multi-disc clutch. With integrated functions such as the removable bed bridge, rapid traverse and a taper turning device, this series offers optional solutions for machining long workpieces or large flanges.

- One-piece heavy-duty cast bed for • increased rigidity
- Sturdy headstock design with large • spindle bearings Rapid feed on 2 axes for fast
- positioning
- Taper turning attachment for additional applications
- Well-designed safety functions •
