## **CLARIFICATIONS**

**Re:** Call for market consultation on the grounds of Article 44 of the PPA for the submission of indicative proposals for Modernisation of fuel handling machines 5,6PL00E01, type MHC-B-1000-3M-Y 4.2.

**Dear Sirs/Madams,**

Referring to the call for market consultation for the submission of indicative proposals for **Modernisation of fuel handling machines 5,6PL00E01, type MHC-B-1000-3M-Y 4.2** provides the following clarifications:

**Question No. 1** Annex 1, item 1.1 states that the telescopic mast kit is in the scope of this inquiry. Details on this item of equipment, however, are not provided in any part of the specification.

Would you please specify whether the telescopic mast kit is subject to this inquiry and, if it is, please send a more detailed specification of this equipment!

**Response:** The delivery of the telescopic mast kit is not subject to QP No. 54258. Its specifications were removed from the technical requirements for call for market consultation. However, Annex 1 of the technical requirements contains specification of the seismic requirements for equipment and the mechanical part requirement remained in the annex: telescopic mast kit.

When submitting an indicative proposal, please do not consider the telescopic mast kit requirement.
