VEC (subject)

In response to your request for Market consultation no. 54730 dated 27.09.2024, we provide the cost of the equipment, which we have prepared based on the Technical Specification "Доставка на един брой модул за вихровотоков контрол с твърда ротационна сонда на ПГВ 1000М".

Inspection modular systems for inspection of tubesheet of steam generators in the following delivery composition:

- "ET-ROT" module for rotary metal inspection of tubesheet using Sorotec probe
- Related services such as factory and functional testing, staff training

The system is not compatible with SGIS system.

The system does not contain:

- calibration scales
- SOROTEC probes
- measuring devices
- methodologies and qualifications

The estimated cost of the equipment and related services is 748 000,00 EUR

Estimated delivery time for module: 12 months

Terms of delivery: DAP (Incoterms 2020)

Payment terms: 20% advance payment upon signing the contract, 70% upon completion of incoming inspection, 10% upon signing the functional test report.

Subject to change in accordance with changes in the requirements of the technical specification for the subject of procurement.

We also provide attached recommended composition of the equipment, which can be used in future to fulfill all inspection and repairs procedures.

Best regards,

Adrian Kovalyk
