Reff.: Indicative offer for market consultation № 57668 "Modernization of drives of working elements of the control and protection system (WE CPS) from a group and individual control system of 5, 6 power unit"

Dear Madams and Sirs,

Based on the market consultation № 57668 "**Modernization of drives of working elements of the control and protection system (WE CPS) from a group and individual control system of 5, 6 power unit**", and after renewed double check of all requirements in the technical specification, hereby please find our indicative offer in accordance with the technical requirements, attached to the market consultation invitation.

The total price for whole scope according to the technical requirements, including working design project, delivery of equipment, installation works and commissioning, as well all other costs for this topic, is:

60.474.000 EUR, net of VAT

Execution of the works, included in the subject of the market consultation, will follow the requirements, described in the technical specification / terms of reference, having in mind the time frame given by you in amount of 1460 calendar days.

Duration of the main activities according the technical specification will consider the required time frames regarding the submission and acceptance of a detailed design, based on given input data, following equipment delivery and execution of erection / installation works. Installation works and commissioning will be carried within the periodical maintenance outages of the both units as per requirements in the technical specification.
