Subject: Price proposal for Market Request No. 57668 "Modernization of drives of working elements of the control and protection system (WE CPS) from a group and individual control system of 5, 6 power units"

Dear partners,

In response to the Market request No. 57668, regarding the "Modernization of drives of working elements of the control and protection system (WE CPS) from a group and individual control system of 5, 6 power units" we are pleased to submit our indicative commercial proposal. This offer is fully compliant with the technical requirements provided in the request documentation.

Project total price: 61,773,900.- EUR (excluding VAT)

This price covers the complete scope of work, including the detailed design project, equipment delivery, installation, commissioning, and all associated costs.

We confirm that the project will be executed according to your technical specifications within the requested timeframe of 1,460 calendar days. Our schedule accounts for all key milestones, including design approval procedure, procurement, and site works. Please note that installation and commissioning will be strategically aligned with the scheduled maintenance outages for both units as specified in the requirements.
