

# QUALITY MANAGEMENT POLICY OF KOZLODUY NPP EAD

In fulfilment of the declared policies and priorities, the Management of Kozloduy NPP EAD apply **quality requirements** to all the processes, activities and products as an integral part of the overall management system.

The Company's policy on quality management is focused on achieving the following **objectives**:

- quality assurance of the processes, activities and products of Kozloduy NPP in accordance with the adopted normative acts and standards;
- management system development;
- maintaining and updating the Company documents;
- assurance of the quality requirements for the products and services from external organisations with top priority on their relation to safety.

To maintain and continuously enhance quality in the Company, the Management will adhere to the **principles** of:

- applying a graded approach to the requirements regarding the products and activities of each process in view of their relation to safety;
- assessment and improvement of the management system processes;
- self-assessment, evaluation, control and improvement of the Integrated Management System, with the highest level of safety as the top priority;
- applying relevant standards, applicable normative quality requirements , or stricter ones with regard to the suppliers, subcontractors and consumers of services and products of Kozloduy NPP EAD;
- periodic review and timely incorporation of the necessary modifications in the management system controlled documents, and the related ones.

The Kozloduy NPP EAD managers at all levels are **committed** to comply with these principles and, therefore, create conditions for the involvement of all the personnel in the maintenance and continuous enhancement of quality in the Company.

The Quality Management Policy of Kozloduy NPP EAD is communicated to all the Company employees, and each and every one of them is responsible for applying its principles in their efforts towards achieving the set objectives.
