

# ENVIRONMENTAL MANAGEMENT POLICY OF KOZLODUY NPP EAD

A major priority of the Company Management is to protect public health and the environment from adverse impacts resulting from the activities conducted on the site of Kozloduy NPP EAD.

Kozloduy NPP EAD, in the capacity of a nuclear facility operating organisation, exercises constant, systematic and comprehensive control over the activities, products and services that have a harmful impact on the environment and public health in non-radiation related aspects.

In this sphere, Kozloduy NPP has oriented its environmental management policy to the achievement of the following **objectives**:

- protection of the atmosphere and the purity of atmospheric air;
- protection and management of water in the region of Kozloduy NPP;
- safe management, minimisation and utilisation of non-radioactive wastes;
- energy efficiency and assessment of the environmental impact of the raw and other materials used;
- minimising the risk of environmental damage and incidents.

The environmental protection and management of the Company is based on the following principles:

- implementation of the requirements of the national and EU legislation regarding environmental protection and management;
- maintaining compliance with the conditions laid down in the permits issued to the Company by the competent authorities on environmental issues;
- systematic planning and reporting on the performance of the environmental policy, objectives and programmes;
- implementing effective monitoring and control of the processes and activities that affect or might affect the environment in an adverse way;
- periodic review of the status and optimising the existing environmental protection infrastructure;
- ensuring and maintaining the necessary resources for preventing and/or limiting adverse impacts on the public and the environment as a result of accidents, extreme weather conditions and events;
- sustaining and enhancing the competence and safety culture of the Company personnel with respect to environmental protection;
- appropriately informing suppliers about the environmental policy of the Company;
- maintaining public relations on the status and measures for environmental protection.

To implement the environmental policy and objectives, the Company has established and maintains a system of activities, measures and facilities to effectively limit the adverse impacts of Kozloduy NPP EAD on the environment.

The Kozloduy NPP EAD Management is committed to maintaining and improving environmental management as an integral part of the Integrated Management System of the Company.

The environmental management policy is communicated to all the Company employees and each and every one of them is responsible for applying its principles in their efforts towards achieving the set objectives.
